Subject: RE: Rating system for review of BWMS performance data
Date: Wednesday, January 4, 2017 11:58:00 AM

Hi Debra,

Just to reiterate what I think I told you on our last conference call, your rating system for BWMS data is fine.

Jack

Subject: Rating system for review of BWMS performance data

Jack and Josh,

To ensure the review of existing performance data is uniform, we developed a basis for rating performance data that is attached for your review. We are also going to have Mario review once his contract is in place.

Please note that the international scheme for type approval of BWMS does not contain some of the specifics in the USCG type approval program or normal QA/QC checks in sampling. We are going to include a description of the international type approval process and the issues associated with international data collection in the TDD.

Kind regards,

Debra
